Your need, designed your way...

IT Infrastructure

IT infrastructure has most important role in any organization besides their employees. Computer network design and functions intricately connected to every productive moment in business - IT infrastructure is down, business productivity is zero!

At DS Network, we intend to implement latest technological advancement to design & setup IT infrastructure in every office.

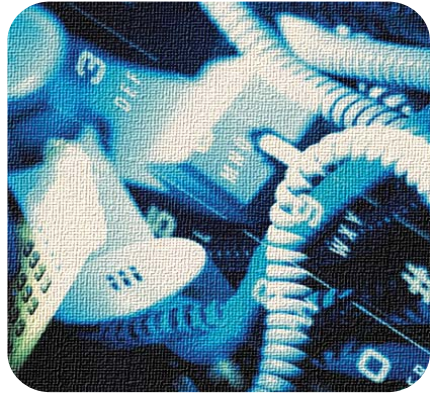

Our experts can access your IT requirements and provide you with best network design and solutions possible to fit your organizational needs. DS Network has solutions for every organization small OR big.

What we offer...

- Design & Setup Computer networks
- Structured cabling for computer networks
- Wi-Fi Networks
- Virtual Private Networking (VPN)
- Inter-Linking multiple branch offices
- Windows server setup for Active Directory, DNS & Other services
- Microsoft Exchange server for corporate emails
- IIS & Intranet Setup
- Terminal servers & Data Management
- Inter-Office Instant Messaging service

Does your office have any special requirements, we can surely help...

Telephony

DS Network has variety of easy, reliable & affordable Telephony System to satisfy your needs for Small Office to multilevel organization. We can design communication system that meet unique service requirements of your organization. It supports any future growth in your organization, keeping you on top of all your communication requirements at all times. We always use high standard products in our system design from very reputed companies like...Cisco, Linksys, Grandstream, Audiocodes, Aastra, Polycom, Patton, Mediatrix etc.

Telephone system features...

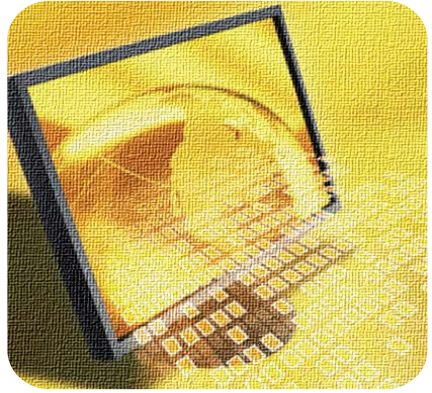

- Integration with Analog & Digital telephone lines
- Unlimited extensions & multiple simultaneous calls
- Remote extensions for Branch offices & on-road employees
- Automated call handling (IVR)
- Call queues, Music on Hold
- Fax service with fax-to-email
- Voicemail system with email notifications
- Call Hold, Call Waiting, Call Forwarding, Call Parking
- Paging & Intercom, Hot Lines
- Audio & Video conference calls
- DISA & Call back

SIP Trunking & International needs...

We can design telephone system to support SIP Trunks provided by many ITSP services. SIP Trunk is an inexpensive alternative to digital ISDN interface like...BRI, T1 & E1 to support high call volumes. SIP Trunks can offer significant cost-savings for enterprises, eliminating the need for local PSTN gateways, costly digital interface hardware.

Your international communication needs can also be easily satisfied by integrating different VOIP services within telephone system offering you variety of different options to suit your office needs!

Software Solutions

Better, efficient and speedy out-comes of any work are key requirements of any successful business. In today's digital world it is almost impossible to achieve this without use of computer systems and utilization of proper software solutions.

Our team at DS Network, can help your business achieve all the desired results, by accessing work methodology and suggest the best possible solutions available in the market.

Customized need?

We can analyze your requirements and come up with efficient and cost effective design.
